Once you acquire shooting equipment, you need a place to store and protect it. Both **Thune** bags are made of double layers of strong nylon and feature sturdy, military style zippers, straps which encircle the bag, and a laminated wood plate to stabilize the bottom. These bags are long enough to transport your shooting jacket unfolded.

Thune Equipment Bag

Pelican General Equipment Case

The **Pelican** Case is probably the ultimate in protection for your gear. It is large enough to carry everything you need, and it has built in wheels to make it easy to move around. Several of the Army shooters have found it does the job very well. It has latches on both front and sides and is waterproof. It has a lifetime warranty as well.

The **Creedmoor** Sports Shooting Equipment Travel Bag is a very well made bag that is large enough to carry everything you need with plenty of compartments to keep things sorted and handy. It can be carried as a bag or as a knapsack leaving your hands free. It is made in the USA and is available in blue, red, green and OD green.

Shooting Equipment Travel Bag

Lost baggage is a real possibility when traveling via air. Airlines require all baggage to be identified with your name and address. However, the paper tags supplied by the airlines can be easily torn and lost. We recommend a more durable tag that is a fun item as well. **EZ Tag** makes quality tags that incorporate shooting logos or actual targets, as well as other custom designs. Show your pride in your sport with a shooting luggage tag. For information contact the **EZ Tag Company**, P.O. Box 750143, Fairbanks, AK 99775.
