

Shooting Mats

Kurt Thune	
Deluxe Waterproof Mat	15462
Extra Foam - Soft	15463
Extra Foam - Firm	15464

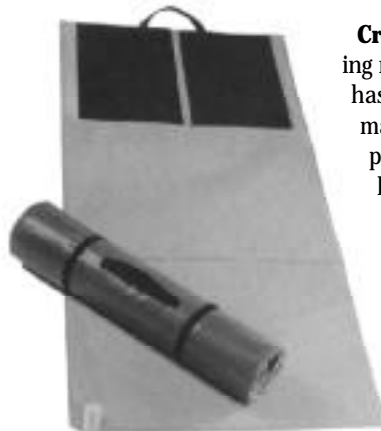

A shooting mat will help keep you dry and make your firing point more comfortable when shooting prone. A mat provides non-slip surfaces for your elbows to give you a more stable position.

Kurt Thune Shooting Mat

We carry several mats. The **Kurt Thune** Deluxe Waterproof shooting mat is the mat selected for the 1996 Olympics in Atlanta. It features thick waterproof padding and Top Grip™ rubber to keep the shooter's elbow in place. This Deluxe model has double padding and a zipper in the side of the elbow area for easy adjustment of both thickness and firmness. Firm or soft padding can be used on top depending on the shooter's preference. The Deluxe Waterproof model has a plastic back to stay dry outdoors. It is foldable in four parts and has a carrying handle. It weighs about 2.5kg and comes in blue.

Creedmoor Armory	
Roll-Up Mat	22N040
Fold-Up Mat	22N042

Creedmoor Armory has two models of shooting mats available. The Roll-Up shooting mat has a green waterproof vinyl bottom and a marine finished top with textured rubber pads for elbow placement. The Fold-Up mat has a blue waterproof bottom and a marine finished top with textured rubber pads. Interior padding is closed-cell neoprene sponge which provides extra comfort and durability.

Creedmoor Armory Roll-Up Shooting Mat

Winstead Economy Mat	60600
----------------------	-------

The **Winstead** Mat is an economy mat with an unusual feature. It is made of heavy canvas with a non-slip elbow surface. It is made in four sections and folds into a compact package that can be used to carry other things around the range. To fold it, simply lift both handles.

Winstead Mat

Winstead Mat, Folded

The unusual feature of this mat is the construction. Because it is not sewn down the sides, you can remove the padding and throw the mat into the washing machine. Just like magic, a clean mat. You can also add or remove padding as you desire for your comfort. The padding is common carpet padding, and the rules are quite liberal as to thickness.

**Kneeling
Rolls**

Kneeling Rolls

Gunsmithing, Inc. Cordura Kneeling Roll	10400
Walter Gehmann Leather Kneeling Roll	13490
AHG Anschütz Top Grip™ Kneeling Roll	37372

A good kneeling roll will give the shooter proper support and allow for a comfortable, steady position. The kneeling roll must conform to the shooter's instep. A kneeling roll can be stuffed with several different materials. The material you choose must allow the roll to be flexible enough to fit your instep but not too flexible as to compromise support. Cedar chips make an excellent stuffing. These chips can be found at any pet store (gerbil litter). Three kneeling rolls are stocked: the **Gehmann** leather, the **Gunsmithing, Inc.** cordura and the **Anschütz** Top Grip™. Each does a good job. All are shipped empty and conform to the current ISSF rules.
